

Date Input Field

You are now able to have an **additional input field** set to a **date selector/calendar**.

In order to enable this:

1. In the **Template Builder** select “**Add Input Field**”.
2. In the **Dropdown** Select “**Date**”.
3. Enter in a **Name** for the Field.
4. If you want to make the **field mandatory**, click the **checkbox** next to the “**Mandatory**”.
5. Select “**Save Input**”.
6. **Publish** the Template.

Now once you go to Conduct the Audit you will see a field like this
