

iPad storage

On the desktop you can select to save images into an AuditComply Folder on the device, this ensures the images are backed up and not just saved on the Audit.

1. Navigate to Administration Panel > Mobile App Settings.
2. Tick the “**Save images taken with the camera to a folder on the device**”.

Now once conducting an Audit on the iPad and you take a new photo with the iPad it will add that photo to a folder before submitting.

PLEASE NOTE:

The image is added to the folder once it is taken not once it is submitted.
