

Schedules

The schedules API URL is designed to return a list of all schedules with the following fields:

schedules/

<int>	'id',
<Template>	'template',
<str - Date>	'when',
<str>	'status',
<User>	'who',
<Asset>	'asset'

Template:

<str>	'name',
<int>	'id',
<int>	'version'

User:

<str>	'username',
<str email>	'email'

Asset:

<int>	'id',
<str>	'name'

This endpoint can be accessed via the <https://api.auditcomply.com/schedules/> endpoint URL. An explanation of the fields can be found below:

- id - The unique ID of the Schedule
- template - The Assessment Template which the Schedule will use.

- when – The date of when the Schedule is due for
- status – The current status of the Schedule. (eg. pending, overdue)
- who – The User assigned to the Schedule.
- asset – The Asset the Schedule is attached to.

Template:

- name – Name of the Template.
- id – Unique ID of the Template.
- version – The current version of the Template.

User:

- username – Username of the User.
- email
- email – Email of the User.

Asset

- id – The unique ID of the Asset.
- name – The name of the Asset.

Creating

Schedules can be created by using the endpoint <https://api.auditcomply.com/schedules/>. They can be created in single and multiple as seen below:

Single:

```
{"template_id":12345, "who_id":12345, "asset_id":12345,  
"when":"2020-12-11 13:37"}
```

Multiple:

```
{"schedules": [  
  {"template_id":12345, "who_id":12345, "asset_id":12345,  
"when":"2020-12-11 13:38"},  
  {"template_id":12345, "who_id":12345, "asset_id":12345,  
"when":"2020-12-11 13:39"},  
  {"template_id":12345, "who_id":12345, "asset_id":12345,  
"when":"2020-12-11 13:40"}  
]  
}
```
