

Schedules

The schedules API URL is designed to return a list of all schedules with the following fields:

schedules/

```
<int>           'id',  
<Template>     'template',  
<str - Date>   'when',  
<str>          'status',  
<User>         'who',  
<Asset>        'asset'
```

Template:

```
<str>           'name',  
<int>           'id',  
<int>           'version'
```

User:

```
<str>           'username',  
<str email>    'email'
```

Asset:

```
<int>           'id',  
<str>           'name'
```

This endpoint can be accessed via the <https://api.auditcomply.com/schedules/> endpoint URL. An explanation of the fields can be found below:

- id - The unique ID of the Schedule
- template - The Assessment Template which the Schedule will use.

- when - The date of when the Schedule is due for
- status - The current status of the Schedule. (eg. pending, overdue)
- who - The User assigned to the Schedule.
- asset - The Asset the Schedule is attached to.

Template:

- name - Name of the Template.
- id - Unique ID of the Template.
- version - The current version of the Template.

User:

- username - Username of the User.
- email
- email - Email of the User.

Asset

- id - The unique ID of the Asset.
- name - The name of the Asset.

Creating

Schedules can be created by using the endpoint <https://api.auditcomply.com/schedules/>. They can be created in single and multiple as seen below:

Single:

```
{"template_id":12345, "who_id":12345, "asset_id":12345,  
"when":"2020-12-11 13:37"}
```

Multiple:

```
{"schedules":[  
    {"template_id":12345, "who_id":12345, "asset_id":12345,  
"when":"2020-12-11 13:38"},  
    {"template_id":12345, "who_id":12345, "asset_id":12345,  
"when":"2020-12-11 13:39"},  
    {"template_id":12345, "who_id":12345, "asset_id":12345,  
"when":"2020-12-11 13:40"}  
    ]  
}
```
